Five Year Plan

The strategic roadmap to transform the homelessness response system

Sub-Regional Implementation Plans

Now what does it mean to implement and act on those goals in each sub-region?

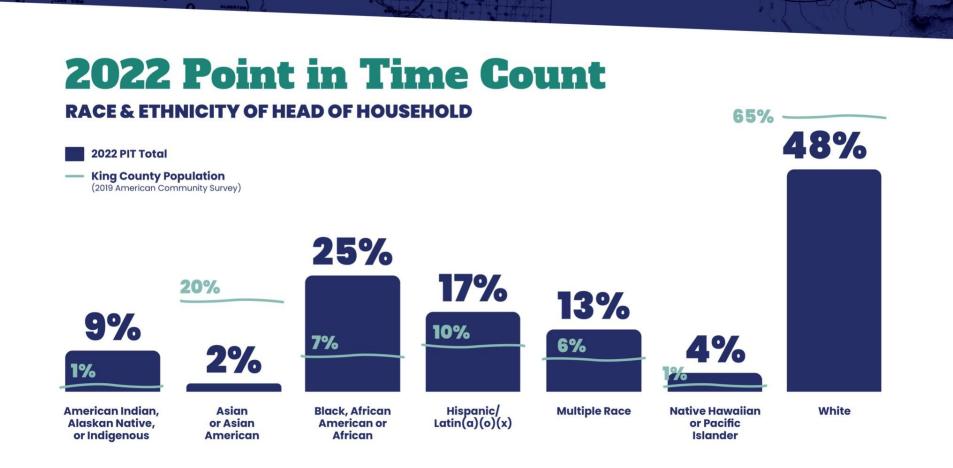

Our Five Year Plan is our shared roadmap.

It is an evidence-based, data-driven tool to align our work and decisionmaking in service of our neighbors experiencing homelessness, and our community as a whole.

More than 62,000 PEOPLE experienced homeless

experienced homelessness at least once in 2022.

Source: WA State Dept. of Commerce

Solving homelessness will take all of us.

Our Role

CURRENT STATE

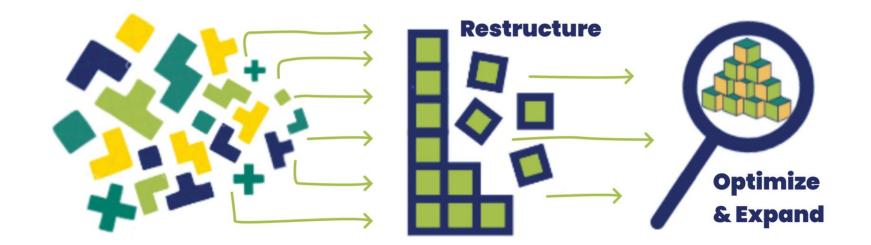

Scarcity

FUTURE STATE Shared Abundance

An experience that feels chaotic and unsafe, polarized and limited in what it can achieve. A single, efficient, successful system that has affordable housing for all with accessible high-quality services on-demand countywide.

Our agency offers the infrastructure, coordination, and centralization of resources and work to make that scale possible.

Engaging Countywide

Over 1000 Partners Engaged Throughout Process

RAF

Our Roadmap centers seven strategies

- 1. Dramatically reduce unsheltered homelessness
- 2. Restructure the service system
- 3. Deliver accessible high-quality services
- 4. Reduce impact of racism
- 5. No family with children sleeps outside
- 6. Every unaccompanied youth and young adult has a home
- 7. A unified, regional approach

Dramatically reduce unsheltered homelessness

We need to:

- Expand temporary and permanent housing to meet our community's need
- Improve housing and supports for individuals with the most significant needs
- Assess and update our existing infrastructure
- Scale up "Partnership for Zero" to achieve "Functional Zero"

PERMANENT HOUSING 48,271 - 3,052 = 45,219

TEMPORARY HOUSING 23,018 - 4,148 = 18,870

UNITS NEEDED BY 2027 CURRENT STOCK (2022)

1 Our current housing gap is immense

Temporary Housing Options

Recovery Housing

1

- Harm Reduction
- Treatment
- Recovery Support
- Sober Living

Medical Respite

- Provides ongoing
 healthcare
- Reduces emergency room visits

Micro-Modular Shelter

• Tiny Home, Pallet Shelter

Emergency Housing

- Small capacity
- Non-congregate
- Privacy & dignity

Restructure the service system to improve capacity, supports, and efficiency

- Scale **prevention and diversion** to reduce inflow
- Optimize funding for services and operations

- Support our front-line workers and stabilize the workforce
- Redesign our outreach services to geographically cover our entire county, serve those who need it most, and improve coordination
- . Improve our severe weather responses
- . Grow and diversify our **portfolio of service providers**
- Standardize and support person-centered healing

One of the most effective ways to address homelessness is to end it before it begins.

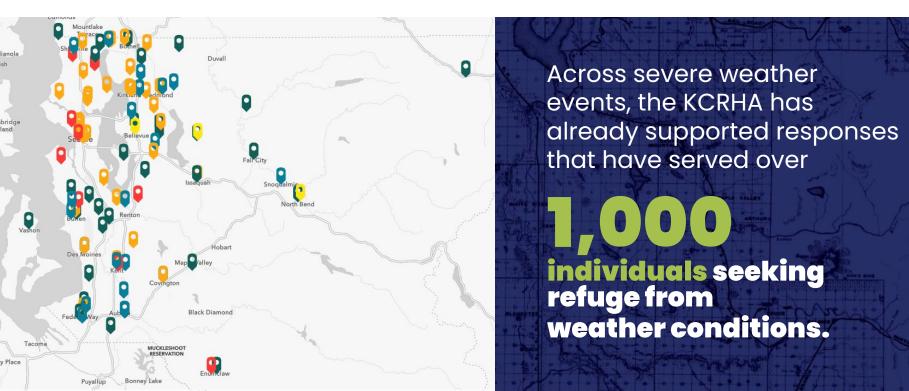

2

If flexible diversion and prevention funding were available,

up to 1,175 Households

may be diverted from homelessness each year.

2 Addressing Severe Weather Response Will Continue to Be a Top Priority

Deliver Accessible, Accountable, and Responsive Services

- Develop and refine the Ombuds process of ensuring that services are accountable to people experiencing homelessness
- Develop continuous feedback channels for program participants (web and mobile)
- Develop a process for participants to control and manage their own personal data (HMIS)
- Support real-time information on resource availability

Responsive services look like:

- **Partnering with 211** to ensure homelessness services information is up-to-date and accurate.
- Online platforms that are easy to use, and available to all
- Developing resources that **center the needs** and desires of those who will use them
- Continually monitoring and improving our systems

4 Reduce the impact of racism

- Center equity across all services
- Improve data collection to better understand how homelessness is experienced across all populations, including:
 - Immigrants and refugees
 - Black and African Americans
 - Indigenous and Native Americans
 - People living with disabilities
 - LGBTQIA2S+.
- **Be accountable and transparent** to community partners that represent communities most impacted.

We prioritize equity, because we know that the human consequences of racism and inequity affect us all.

We know the causes of homelessness disproportionately impact BIPOC individuals:

- Inaccessible Housing
- Redlining and Preventing Home Ownership
- Poverty/Deep Poverty
- Segregation/Rental Housing Discrimination
- Incarceration

4

• Access to Quality Health Care

5 No Families with Children Sleep Outside

- Improve coordination so all families experiencing homelessness have rapid pathways to housing
- Partner with healthcare and education systems
 - to prevent homelessness and provide wrap-around services
- Expand evidence-based program interventions, and scale up what we know works

Families with children make up 17% of people experiencing homelessness. The majority of children are under 10 years of age.

Every youth and young adult has a home

- Expand housing and program interventions for youth and young adults
- Collaborate across the system to prevent youth and young adult homelessness, and reduce inflow into the system
- Integrate a strengths-based and healing approach across all programs and policies
- Develop a coordinating body of Youth and Young
 Adults to inform our system

Of the 13,368 individuals experiencing homelessness in King County on the morning of the 2022 King **County Point-in-Time Count, 850 individuals** (6.5%) were unaccompanied **Youth and Young Adults**

The Region Acts as One to Address Homelessness

- Partner with all 39 cities in King County to consolidate and streamline funding
- Elevate Coordinated Entry as the primary pathway for housing placement
- Develop coordinated and tailored sub-regional implementation plans
- Partner with Systems that lead in serving
 - a. Veterans

- b. Seniors and Older Adults
- c. People transitioning out of jails and hospitals

WE MUST ADOPT A UNIFIED REGIONAL APPROACH

-7

We all want homelessness solved; solving it will take all of us.

Sub-Regional Implementation Plans

Now what does it mean to implement and act on those goals in each sub-region?

Sub-Regional Implementation Plans

What: Initiatives tailored to the sub-region informed by data and partners.

Who: Cities, healthcare agencies, behavioral health providers, public safety partners, homelessness providers, community based organizations.

How: Sub-regional tables and city staff are plan contributors.

When: Building out initiatives in support of 5-Year Plan Objectives over coming months.
